Gorran is lucky– he lives in a village right on the Cornish coast. He loves science and nature, and wishes he could put the two together somehow to solve the world's problems. His mum is always busy working and seems sad, but his friend Tick keeps him cheerful and he knows he can always lean on his neighbour Grace, who's like a (cool) big sister.

One spring day, his life is forever altered by an accident and a chance encounter with a girl in a soft grey coat. Before long, the three friends are mixed up in a race to protect a hidden world from certain environmental disaster.
